

The Corona de Aragon Vocational Training School stands out for its history, strategic location, multidisciplinary teaching and relationships with companies, institutions and social partners. Currently, it provides face-to-face teaching for 1,400 students, on-demand specialized teaching, as well as professional certificates.

International relationships are also a key issue. In fact, we participate in four international projects, with fluent relationships with different European countries, vocational training schools, universities and research centers. Our students can choose among a wide range of places to spend their period of practice in Europe.

SAAM project is a challenging experience to expand our horizons. We expect to contribute with our experience and to benefit from the collaboration.
